

How to Obtain BuyerEase in 7 simple steps

BuyerEase is useful for any organization having small or large product-range, multi-location buying activities, multiple vendors and multiple buyers. It is best suited for Buying Houses, Exporters, and large retailers (in sourcing) and overseas customers.

BuyerEase can be **EASILY ACQUIRED** in just a few simple steps...

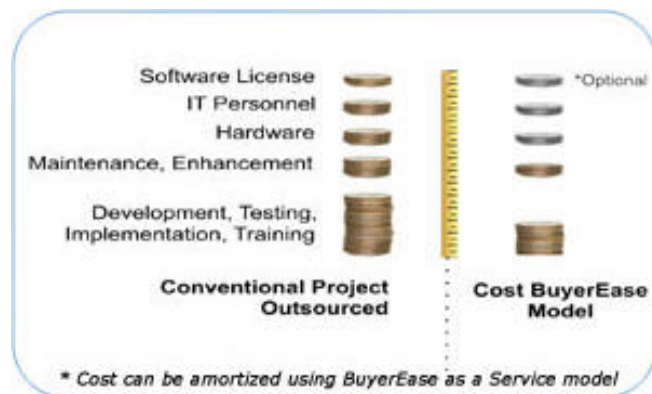

- STEP 1.** **Get yourself registered** and our customer service executive shall contact you to help you assist through the process.
- STEP 2.** **Acquire knowledge** of BuyerEase modules, features, value additions and costs.
- STEP 3.** With the **agreement on commercial terms** and having the benefits of a pocket friendly cost model, you may start with the **release of a Letter of Intent (LOI)** along with a nominal **token fee**.
- STEP 4.** You may select people from different departments to **formulate a team** to execute the pilot run, i.e., **use the software on trial basis**.
- STEP 5.** BuyerEase technologists shall **configure the software for trial usage** and provide the necessary **assistance to the user groups** in carrying out the job stepping, using the software, and generating the expected output.
- STEP 6.** You **review the feedback** and shall **confirm the order**¹. A project charter shall mutually be drafted describing the deliveries, configuration, and training schedules.
- STEP 7.** The **training sessions**, as would have been scheduled in the project charter, shall be executed to the pre-specified user group of the customer by FSL Software Technologies Ltd team.

¹ In case, you wish to abort the project though most unlikely at this stage, the token money paid shall be adjusted towards the expenses incurred to configure the software and providing assistance for the trial usage.

BuyerEase COST STRUCTURE

The BuyerEase Cost Model emerged basically to achieve **ECONOMIES OF SCALE** while implementing an IT solution in an organization. It is one of the most cost effective solutions that put your process in place. The conventional method of owning a software solution has high cost and requires tremendous efforts in conceptualizing, developing, testing, implementation, and maintenance.

BuyerEase amortizes the cost of development and enhancement via its product development nature. It is the best suited for organizations having sufficient resources and are willing to implement on their own infrastructure.

BuyerEase is also offered as On-demand software or Software as a Service (SaaS) a way to share the cost of managing and maintaining across various clients.

Pricing Strategies

The pricing of BuyerEase is user-based as well as server based.

BuyerEase license can be acquired with respect to user-based prices. For a large number of users, you may also sign up for Uniprocessor license, which is for unlimited number of users.
