Salient Features

A few highlights and the factors that help BuyerEase model to emerge and gain wider acceptance are:

- The **application costs** of development, up gradation, enhancements, servers, 3rd party software tools and maintenance, etc. are spread over a **number of clients**.
- **Modular, Customizable, and Scalable -** Available with preferred components for different budgets.
- Immediate and **speedy implementation** with little or no software project experience, no or little training, no maintenance hassles.
- Clients can focus on their core business where as FSL's highly skilled workforce and expertise shall keep it up to date, focusing on **reliability, scalability, security, integration, and service**.
- **Friendly GUI** – n-tier, open architecture, flexible, and comprehensive features with a strong security system.
- The model is normally **run on web-servers -** making it available 24 x 7, anytime, anywhere, and supports spread staff over geo-locations
- Provide **MIS in structured form** so as to enable strategy formulation and decision-making. Report exporting, printing and emailing facility.
- Cutting edge and future proof technologies making a seamless transition to constantly emerging trends **and advancements in technologies**.
- **Risk of software project failure is minimized -** the annual revenue model guarantees a certain level of service at a predetermined fixed cost.

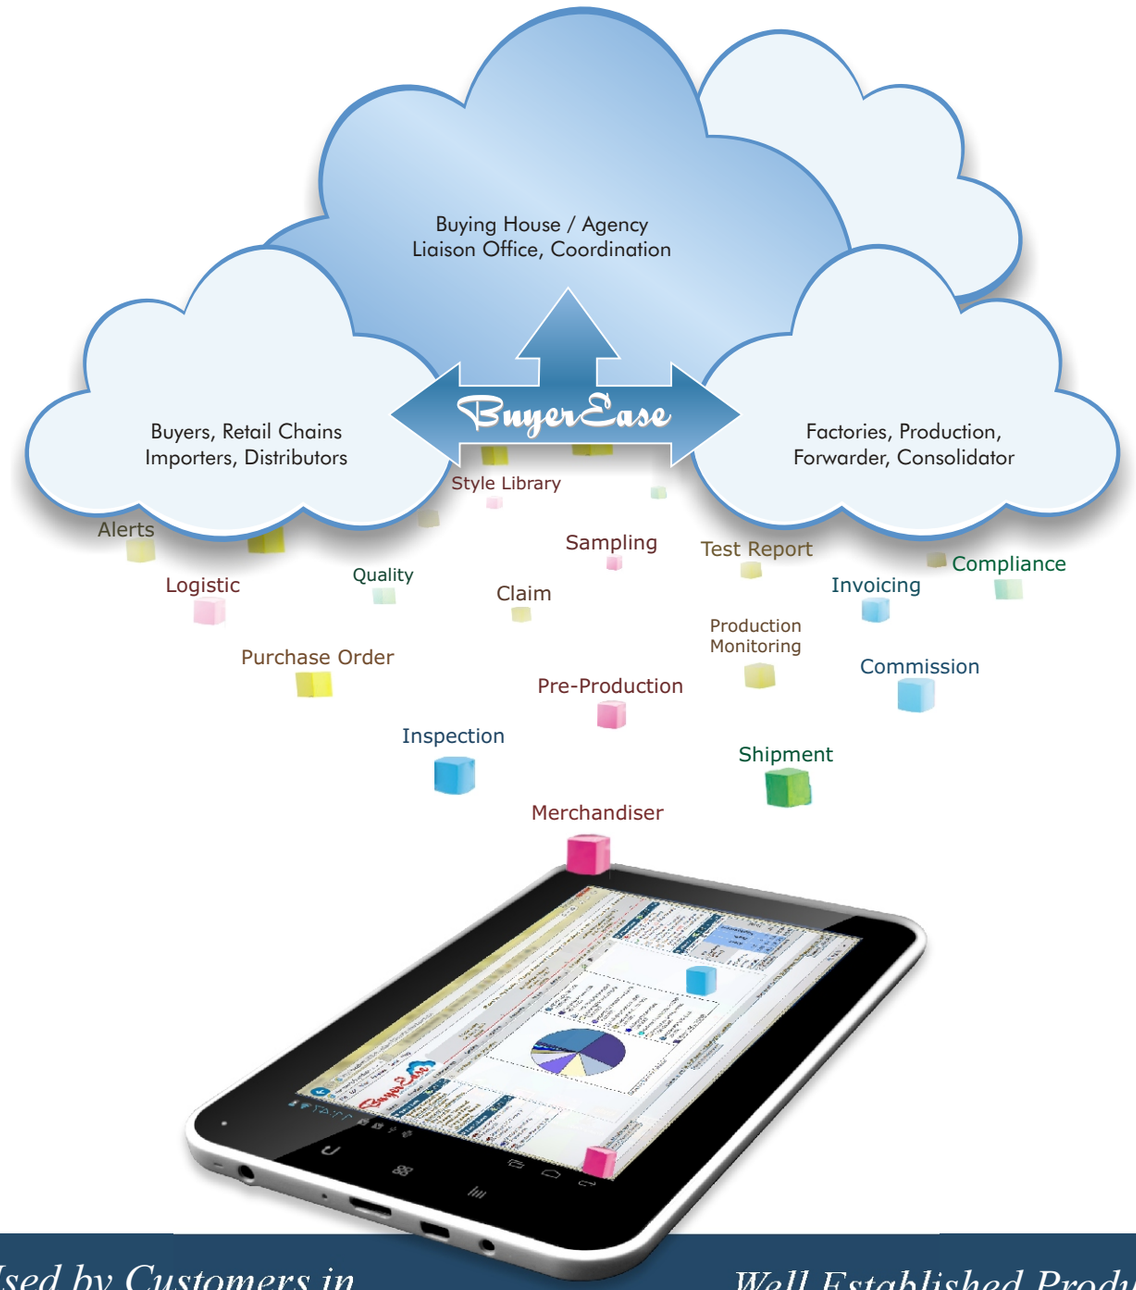
BuyerEase
BUYING PROCESS AUTOMATION



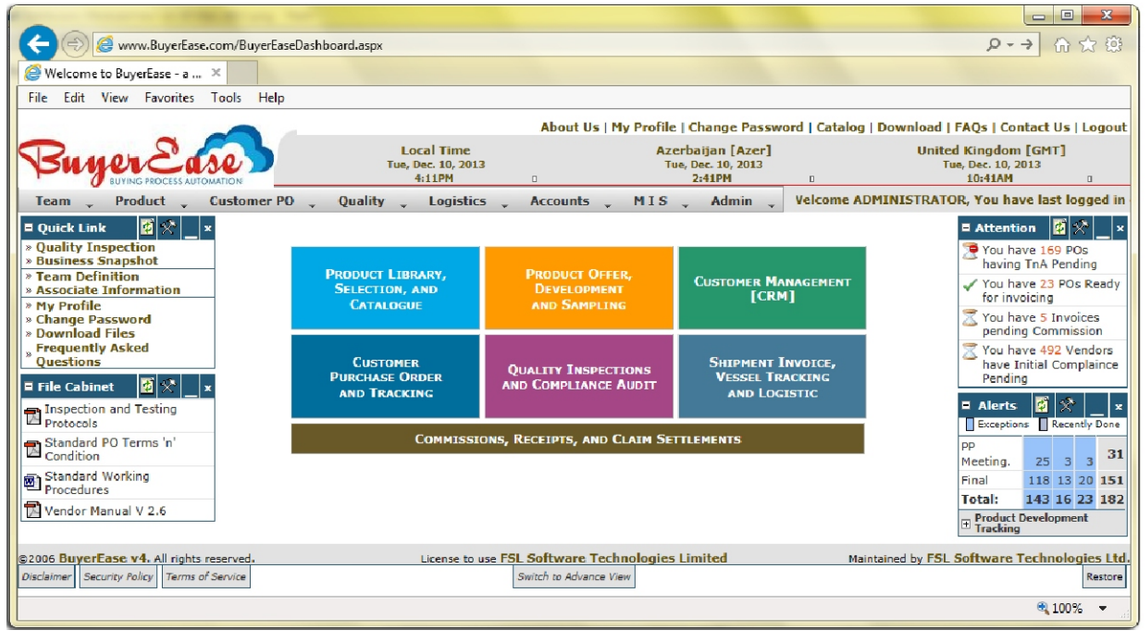
Used by Customers in

India, China, Bangladesh, France, Belgium ...

Well Established Product

Deploy - "On Cloud" or "On Premises"

Buying Process Automation



An End-to-End Software Solution for Sourcing

Key Features

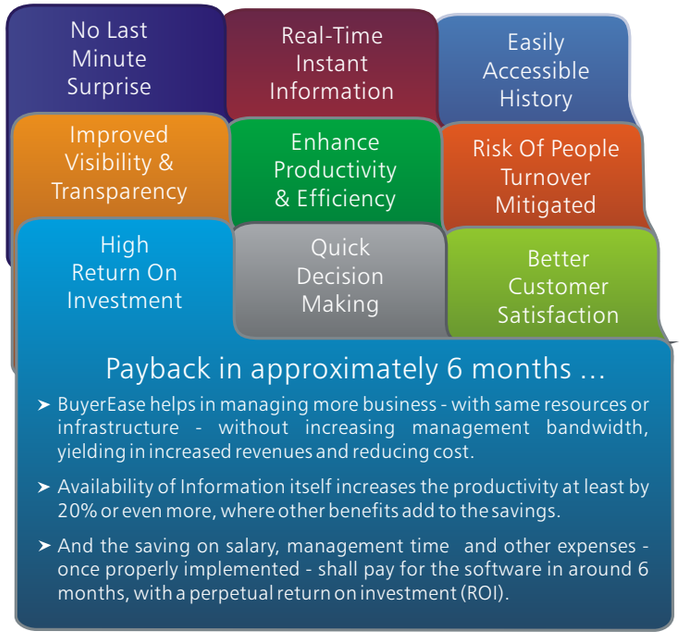
- Manage Product, Style, and Item database.
- Create, publish and share **product catalogue**, collection and website in B2B mode (protected or private with selected buyers) as well as in B2C public mode with anybody on Internet.
- Manage **product-line development** and sample tracking, handling samples, offers, and price quotations
- Track customer purchase order – **pre-production** follow-up, **production monitoring**, inspections, and shipping.
- Generate **alerts and exceptions** with a configurable escalation matrix with features like advance warnings, alerts over email, and intelligent reporting on need to know basis.
- Automate **Time 'n' Activity calendar** - TnA, WIP, Work In-Progress, or Critical Path Management - defining responsibility and target for each activity to monitor the purchase orders through production follow-ups via tests, inspections, and up to dispatching.
- Inspect goods with automatic **AQL** formula, comprehensive defect check list, digital library, product, label, and packing check-list generating **Inspection Reports** and Inspection Certificates.
- Generate and manage **shipping** and post-shipping documents with full traffic and **logistic tracking**
- Manages account receivables through debit notes and receipt of **commissions** from buyer and / or suppliers
- Record, track, and settle **claims** – whether quality, delays, or rebate - between buyers and vendors

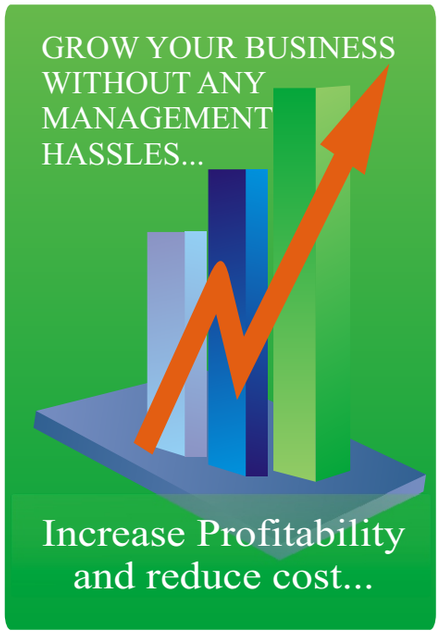
UNIQUE IMPLEMENTATION

BuyerEase understands reasons of failure and provides a complete solution guiding every aspect with its Unique Implementation Methodologies...

- **Ready-to-use:** already managing business operations with number of companies successfully.
- **Installation and Configuration** is done by FSL's technologist in liaison with your people to ensure smooth operations maximizing throughput.
- **Post-Installation Training** is provided using demonstrations → trial usage → hand-holding methods to ensure successful implementation.
- **Data Conversion** is facilitated through automated tools build by the technical team and if required can be built and provided at nominal charge.
- **Integration** with any existing legacy system can also be handled on case-to case basis.
- **Customization:** Though BuyerEase is built on industry standards, best practices, and business processes, but unlikely of you still feel that customization is required, then our team of domain experts can evaluate the gaps and can suggest you an economical solution accordingly.
- **Support:** BuyerEase uptime is ensured through prompt support and service handling daily errands and hurdles to be a reliable information system.

BuyerEase Benefits





For details, please visit www.BuyerEase.com

Challenges	Our Solution
Lack of end-to-end system with no inter-department coordination; high data escaping attention to critical tasks, and no track to work done history	➤ Establishes the buying process - from sample, style library, purchase order tracking to shipment information, product quality (inspections) as well as process quality (compliance audit) ➤ Alerts & Alarms – Works as an assistant having a well defined Task to-do with outstanding and overdue jobs, reminders and automatic escalation matrix
Scattered Information requiring high lead time, efforts, and cost in gathering, compiling, analysing, and negotiating data	➤ Availability of instant information to top management and people concerned enabling quick decision making ➤ Reduces time cycle of information gathering, processing, and negotiating; resulting in saving in efforts, time, cost, confusion, disputes, and stresses
Non-uniform, inconsistent and disintegrated buying process with duplicate data entry at multiple levels	➤ Proven unified solution based on industry best practices - across offices, geo-locations, buyers, vendors, agents, and associates ➤ Consistent processes, procedures, and formats across teams, divisions, and business units with data availability - on online, real-time, up-to-date, instant, across departments and on need to know basis
Virtual team management across different time zones causing delays and communication gaps	➤ Organizes all communication in a structured format making it readily available, improving the work-flow efficiency ➤ Capable of electronic communications – internally (inter-department) as well as externally (vendors and buyers) – minimizing confusions and maximizing efficiency. Fast communication at a lower cost – to access to real-time information - globally and round the clock

Use anywhere - on laptop, desktop, or even TAB
