# An End-to-End Software Solution for Sourcing

Introducing **BuyerEase** - a web based software tool for buying houses, sourcing agencies, liaison offices, retailers, and importers to optimize management in handling product catalog; product development; pre-production approvals; production tracking & monitoring; shipment, traffic, and logistic.

- Manage Product, Style, and Item database
- Create, publish and share product catalogue, collection and website in B2B mode (protected or private with selected buyers) as well as in B2C mode (public with anybody on Internet)
- Manage product-line development and sample tracking, handling samples, offers, and quotations
- Track customer purchase order – pre-production follow-up, production monitoring, and shipping
- Inspect goods with automatic AQL formula, comprehensive defect check list, generating Inspection reports and Inspection certificates.
- Generate and manage shipping and post-shipping documents with full traffic and logistic tracking
- Manages account receivables through debit notes and receipt of commissions from buyer as well as suppliers
- Record, track, and settle claims – whether quality, delays, or rebate - between buyer and vendor

## Key Features

- Generate alerts and exceptions with a configurable escalation matrix on dashboard or even over email
- Automate Time 'n' Activity calendar - TnA, WIP, Work In-Progress, or Critical Path Management - defining responsibility and target for each activity to monitor the PO through production up to dispatching.
- Available 24x7 – being a Web-based software (a WebApp), it is available anytime, anywhere.

Option to deploy “On Cloud” or “On Premises”

Use anytime, anywhere - on PC or on **TAB...**
